JUDGE HILL TO
TAKE THIRD WIFEFormer El Pasoan About to
Marry a Young Girl at
San Antonio.

San Antonio, Texas.—For the third time Judge E. P. Hill, millionaire and one of the former general counsel of the Southern Pacific Railroad company, will embark on the matrimonial sea, his bride being Miss Amelia Allen, daughter of a prominent resident of that town.

About three months ago he left El Paso and went to San Antonio; a divorce followed. Mrs. Hill still makes her home here on Montana street.

About fifteen years ago he secured a divorce from his first wife, who later died. At that time he was considered one of the most successful attorneys in the state and was reputed to be worth several hundred thousand dollars, which he divided with his wife when she was divorced. He then retired from the practice of law and has not been engaged in it since.

A New York paper says that Judge Hill, in settling the divorce suit with his second wife, gave her \$200,000. The same paper stated that Miss Allen, his fiancée, was then at a New York hotel on a visit.

Paso for three years, having resided at 211 Montana street, where he established his home with his wife, who was a Miss Kezer, of Fort Davis, Texas, daughter of a prominent resident of that town.

About three months ago he left El Paso and went to San Antonio; a divorce followed. Mrs. Hill still makes her home here on Montana street.

MINING AND OIL NEWS.

STRIKE BONANZA IN
CINCO MINAS MINEMrs. Marcus Daly and Associates Plan Many
Improvements.

Guadalupe, Mex., July 12.—A big bonanza strike of ore is reported to have been made on the west coast of Mexico in the San Nicolas workings of Cinco Minas, a property sold by Luis Martinez of Esatlan to Mrs. Marcus Daly and associates of New York. It is in the Hastotpaquillo district, state of Jalisco, Mex. The mines, under former ownership, produced many millions in gold and silver, although only developed to a depth of 600 feet. The ore of medium grade was treated in the Santo Tomas Hacienda by arrastres run by water power. Henry E. Crawford represented the purchaser.

Ore Runs Rich.
The newly discovered ore body, when mined and sorted, averages 40,000 grams of silver and 180 grams gold, or about \$1600 Mexican money per ton. Ten tons of ore is ready to be shipped to the smelters. Ore running from 6000 to 7000 grams silver and 24 to 30 grams gold per ton is being piled up as second class, and will also be shipped to smelters for treatment. It is calculated that the output from the mine will be about four cars of high grade ore per month, bringing about \$20,000 a month.

The shipments will be made from Magdalena, a station on the Mexican Southern Pacific railway, to which station an electric railway, to be built, will connect to haul the ore that now is hauled over a rough road.

New Mill To Be Built.
A 250-ton reduction mill will be installed to work the low grade ores, of which there is estimated to be five years' supply in sight, worth \$25 per ton. The reduction works will cost about \$500,000 and plans for the erection will begin soon. The new company will be called the Cinco Minas company.

YUMA MINE BRINGS
HALF MILLION GOLDNorth Star Property Second
Producer—Development
Planned.

Yuma, Ariz., July 12.—The record of the famous North Star gold mine in Yuma county for the past year shows it to be the second greatest producer of the yellow metal of any mine in the southwest. More than a million dollars in bullion was shipped from this mine for the year ending January 1, 1910, and of the time elapsed, only 11 months were profitable because of a fire which closed the mine down.

The bullion was ground out of a 50-ton mill, showing unmistakably the character of the ore handled.

One hundred thousand dollars will be turned back on the property to increase the facilities for mining and milling. The Golden Star Mining company owns the property. The mine has been turning out a gold brick valued at \$50,000 each month during 1910.

LONDON CAPITALISTS GET
FAMOUS OLD ROSARIO MINEProperty Has a Record of Producing
\$400,000,000; Government Once Had
Mint Established at Mine.

The West Mexico Mines company, Ltd., of London, has taken over the famous old Rosario mine at Guadalupe y Calvo in the extreme southwestern part of the state of Chihuahua, Mexico. A contract has been let for the erection of a mill plant to cost \$75,000, the machinery for which will be selected by J. S. McCarthy and Co., of London and Glasgow. The small plant on the property is to be enlarged to 200 tons per day. The machinery is being delivered already. The new plant is to use the all-silica modification of the cyanide process. George Johnston is at the mine superintending the erection of the plant.

The Rosario and other mines of Guadalupe y Calvo are among the most wonderful in the world. The production, about \$400,000,000, was so great and rapid that the government established a mint at the mines to coin the product into money, records of which no other mine in the world can boast. Along the old trail, every few miles, runs from the mine to the Guadalupe, through the great pine forests, are numerous stone monuments marking the graves of bullion packers who were waylaid, robbed and murdered by the most daring bandits ever known in the western world.

COPPER QUEEN COMPANY
BUYS MAVERICK MINEAgrees to Pay \$100,000 Within a Year;
Ore Body in Sight; Considers Plans
Two Large Prospect Shafts.

The Copper Queen company of Bisbee has taken a working bond and option on the Maverick copper property near Florence, Ariz., for one year, with the privilege of thoroughly exploiting the property before making payments. The vendors are George Lobb and Eugene Woodbury. The preliminary examination made by W. E. Stanton and subsequently by Grebe & Winslow, engineers for the Copper Queen.

The latter company agrees to sink two large prospect shafts and perform other extensive development work. The purchase price is fixed at \$100,000, payable in installments of \$10,000, \$20,000 and \$70,000.

The engineers report an ore body in sight on the surface several hundred feet in width and several thousand feet in length, with an average copper content of about 3 per cent for the entire body, which is in the form of a finely disseminated chalcocite. But there are high grade zones of ore within the mass, containing an abundance of disseminated chalcocite. But there are considered one of the most remarkable surface showings for copper ever found, even in Arizona.

RAY CONSOLIDATED COPPER
MINE BEGINS SHIPPING

Barker, Ariz., July 12.—The Ray Consolidated copper mines are ready to ship ore to the Clara smelter at Swansea, Ariz. The Revenue shaft is now down 250 feet and three shifts are lowering it each day. It is proposed to continue sinking to a depth of 400 feet.

In the meantime a tunnel is being driven toward the ore and is now in 600 feet further in order to connect with the big ore body, although some small veins have been crosscut showing good copper values. The ore to be shipped will be taken from the drifts which have been run to great lengths. Mining on a large scale, however, will not be inaugurated until fall.

UTAH MINER INSPECTS SILVER

Silver City, N. M., July 12.—Herbert Salinger of Salt Lake, Utah, in company with J. W. Bible, the local mining engineer, is examining the zinc deposits throughout this county in behalf of the National Zinc company and the Altona Zinc works, two of the largest zinc works in the United States. The companies have favorable opinions of the zinc fields in this county and sent Mr.

Home Endorsement

Hundreds of El Paso Citizens Can Tell
You All About It.

Home endorsement, the public expression of El Paso people, should be evidence beyond dispute for every El Paso reader. Surely the experience of friends and neighbors, cheerfully given by them, will carry more weight than the utterance of strangers residing in faraway places. Read the following:

John Carpenter, 501 North Stanton street, El Paso, Texas, says: "I found Doan's Kidney Pills to be an excellent remedy and I always advise their use to anyone I hear complaining of backache or kidney trouble. While living in Mexico some years ago, I did considerable horseback riding and I believe this affected my kidneys, causing a pain in the small of my back and a difficulty with the kidney secretions. At that time I read of Doan's Kidney pills and through their use, I was entirely relieved. Since then I have taken Doan's Kidney Pills, as occasion has demanded, and they have always proven of benefit."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Phone 2340—R. 1. Res. 3457

Salinger here to secure detail information.

Mr. Salinger states he is well pleased with the numerous attractive zinc showings in this section, which he believes warrants his companies in making large investments, as there seems no doubt of developing a number of the properties into large producers, under a systematic working. Mr. Salinger will also make a visit to the lead and zinc mining properties in the Black range country. In Sierra county, accompanied by Mr. Bible, who has made a thorough report on the Black range, Cook's Peak and Lake Valley mines for eastern parties.

ENGLISH COMPANY TAKES
OVER BATOPILAS PROPERTIES

Advices from London state that the organization of the Batopilas Mining, Smelting and Refining company, Ltd., of London, has been formed to take over the lease of various groups of mines belonging to the Batopilas company of Chihuahua, Mexico. Shares of the English company to the number of 50,000 have been underwritten and listed on the Paris bourse.

Stock of the English company to the amount of 75 percent is owned by the Batopilas company. It is proposed to make a similar arrangement for working other mines of the Batopilas company and also starting new mines throughout the company's concession, which covers 61 square miles in southwest Chihuahua, south of the line of the Orient railway lines.

LONDON SYNDICATE ACQUIRES
MINE NEAR PACHUCA, MEXICO

From Pachuca, Mex., comes word that the Don Carlos mine, which is situated south of and adjoining the Santa Gertrudis company's mines, has been acquired by a London syndicate. The negotiations were carried out by Chas. Greaves of London. The nominal consideration of the sale was \$600,000.

The new company is already at work opening up the property by trenching north and south for the purpose of uncovering the lodes traversing east and west through the property. Afterward, diamond drills will be used to prove up the ore bodies preparatory to sinking the shaft. The Don Carlos has a superficial area of 78 acres.

BURKE CLAIMS MINE CLAY
HAS CURATIVE QUALITIES

Major J. C. Burke, who owns a 100-acre tract of land on the east side of the Mexican National railway, between Cana, Ariz. and Ahumada stations, about 60 miles south of El Paso, has discovered a deposit of white earth, resembling fire clay, and has been making claims has remarkable curative qualities, a mineral estheria. Major Burke is now putting the mineral on the market in Chicago, his former home, and has been making many claims, claiming it cures eczema and other skin diseases.

FRENCH MINING COMPANY
BUY CHIHUAHUA PROPERTY

The French-Mexican mining company called Compania Minera de las Plomosas, has acquired the zinc property in the eastern part of the state of Chihuahua, owned and operated for several years by Jose Lago. Jose Luis Requena of Mexico City is the president and C. Clere is manager. The property has been a regular shipper of high grade lead-zinc carbonate ore and with the systematic development planned by the new owners it will increase its production.

ORIENT FORMS MEXICO
MINING SYNDICATE

A company with \$25,250 capital has been formed in London, Eng., called the Mexico-Orient Mining syndicate, to acquire the mining properties from the Lowell interests along the line of the Kansas City, Mexico & Orient railway. Three copper properties are already under option to the syndicate, which proposes to develop them.

ARISPE MINES COMPANY
PLANS FOR DEEP SHAFT

The Arispe Mines company will sink shafts on the Palo Seco and Alacran to a depth of 500 feet. These shafts have already produced a large amount of high grade silver ore, carrying 5 percent copper and 0.28 ounces gold per ton. The company will also work its Manhattan copper mine. The first unit of a concentrating mill is to be erected.

RICH ORE IN PARADISE MINE.

The Paradise, Ariz., Record says the Whitetail mine in Paradise, at a depth of 120 feet, shows four feet of ore carrying 10 per cent copper in the west drift. The vein on the same level 20 feet from the shaft has widened to eight feet. The Whitetail group consists of 17 claims under bond and eight adjoining claims under location.

NEW CLIFTON MINE COMPANY.

Clifton, Ariz., July 12.—A. T. Thomson, P. B. Scotland, J. B. Baylor, J. G. Cooper and M. O. Simms have associated themselves in the organization of the Clifton-Sonora Mining company, and the articles of incorporation have been filed with the recorder of Graham county. The headquarters of the new company will be at Clifton and the authorized capital stock will be \$500,000.

MINE CAPITAL INCREASED.

Clifton, Ariz., July 12.—The capital stock of the Shannon Copper company has been increased by an amendment to the articles of incorporation. The addition of 30,000 shares at par value of \$10.

MAGDALENA GETS
NEW POSTOFFICEResidences Near Completion.
Scarlet Fever Epidemic
Starts.

Magdalena, N. M., July 12.—For a number of years, the postoffice building has consisted of a corner of the Becker-Mactavish company's store, but on account of the increased business of the local postoffice, it has become necessary to move into larger quarters in one of the new Becker-Mactavish office buildings, where carpenters are now arranging the new fixtures, which have arrived. All of the mail for the western part of the county goes through the office here.

A. L. Clemmons is erecting a fine home south of town, near the Ozark mill. It will be one of the finest homes in this section. Among the other houses that are nearing completion are the large rock home of H. L. Beagle and the adobe home of C. H. Brown. The Magdalena Town Hall company has also completed its new hall.

Ramon Oguin of Socorro has put in a hack line between Magdalena and Kelly.

Mr. and Mrs. Will Sanders and children have moved to Los Angeles, Cal. Mr. Sanders for a number of years was one of the largest cattle owners near here.

Mrs. A. N. Evans and little daughter, Bessie Alice, have gone to Stamford, Texas, for a visit. Rev. A. N. Evans accompanied them to Socorro.

I. F. McKay of Little Rock, Ark., an engineer, who has been visiting his daughter, Mrs. S. M. Small, has returned home.

Mrs. John McDonald has returned to Magdalena with her son, after a visit in Socorro, where she went that the boy, who had whooping cough, might be in a lower altitude.

G. C. Machen has returned from Albuquerque, where his niece, Blanche Machen, was operated on for appendicitis. The operation was successful.

Miss Grace Mogil has returned to her home in Albuquerque, after a visit to her sister, Miss Elizabeth Mordt, of the local forest service office.

The scarlet fever epidemic has again
started in Magdalena. A rigid quaran-
tine has been established.

B. W. Kemp of the well drilling company states he now has a large steam drill and is getting results in the western part of the county.

Capt. Matthews, telephone manager of Socorro, was in Magdalena attending to the extension of his system over the eastern part of town.

Miss Susie Scott has gone to her home in San Antonio, N. M. She will return in September to take a position with the Magdalena high school as intermediate teacher.

GARVANZA SHIPMENT
COMES FROM MEXICOWill Pass Through Nogales
For Spain—Sidewalk
Nears Finish.

Nogales, Ariz., July 12.—The second big shipment of garvanzas to be made from Nogales will require 50 cars carrying 3,320,000 pounds, valued at the custom house at \$250 per 100 pounds, totaling \$83,250. The shipment will be from the states of Sonora and Sinaloa and already a number of cars are in the S. P. yards on the Sonora side awaiting the entire shipment, which will go to Bilbao, Spain.

Nogales has had a heavy rain. Inspector Murphy has gone out in the hills for a rest.

The paving of the 3000 feet of sidewalk belonging to the S. P. company is rapidly being finished on Grand avenue.

The board of supervisors has finished its work of equalizing the county assessments.

A number of Mexican laborers have been collected here to work between Yuma and Tucson on the railroad.

The Coliseum is preparing to open its picture shows under new management.

The strong winds took the roofing from the cement factory here.

CARLSBAD AUTO MAIL LINE
DOES RUSHING BUSINESS

Road Across Sands Under Construction;
Pioneer Horseman Dies; Commis-
sioners Order Bridge Over River.

Carlsbad, N. M., July 12.—The new automobile line between this city and the towns on the plains has been doing an exceptionally large business since starting July 1. Some days it has required two cars to carry the outgoing mail and the mail for 11 towns supplied from the Carlsbad postoffice.

The work of constructing a roadbed across the sand and east of town is being pushed as rapidly as possible and it is thought that within the next 30 days a solid, substantial road will be opened up across the now almost impassible stretch of sand.

"Uncle Jack" Donohue, one of the pioneer horsemen of the Pecos valley, died at the hospital in this city after an illness of two weeks. He was about 65 years of age and has been a cripple for many years past.

At one time he was one of the owners of one of the largest herds of horses which ranged on the Pecos, but of late years gradually yielded to the encroachment of old age. Last spring he sold the last of his herd and with the proceeds purchased a small tract of land close to Carlsbad, where he has been engaged in chicken raising. His

CARLSBAD RANCHERS ASK
FOR MORE IRRIGATION

Wants Additional 10,000 Acres Under
Water; Reclamation Service
Changes Announced.

Carlsbad, N. M., July 12.—In view of the fact that an appropriation has been made by congress of \$20,000,000 for the purpose of completing the various reclamation projects which are now in course of construction throughout the west, and that the Carlsbad project was one of the first to produce any returns, the farmers and owners of land located above the present canal have organized the West Side Farmers' league and have asked the government to convey water to them in the event the water is available and the proposition is feasible. Expert engineers will be asked to investigate the proposition. The land proposed for irrigation is first class, a tract of about 10,000 acres is represented in the petition which has been sent to headquarters.

Under a new ruling from the reclamation service the local engineers will manage the Hondo reservoir irrigation project, near Roswell. Superintendent Foster and assistant engineer Charles May will superintend it as the occasion demands. The engineer who has had the project in charge for the past year has been transferred to Arizona.
